a 1 km residential buffer

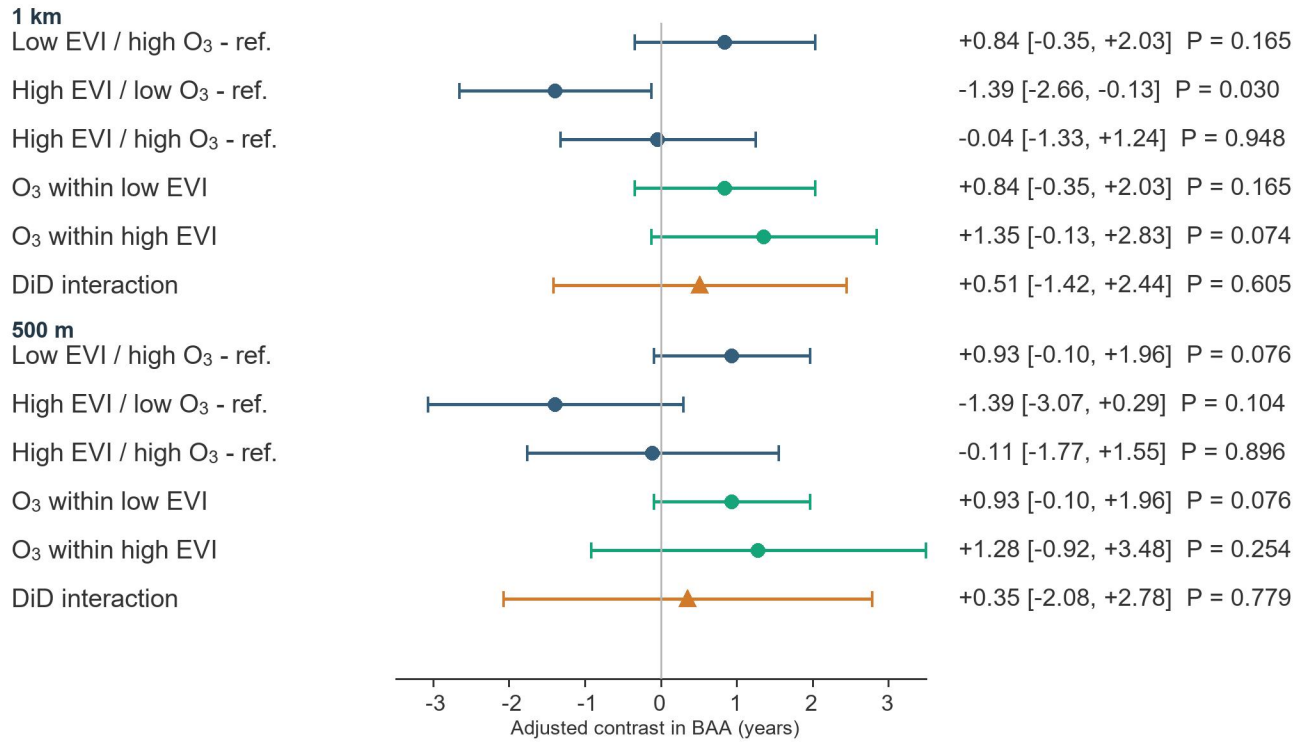

b 500 m residential buffer

Joint exposure pattern

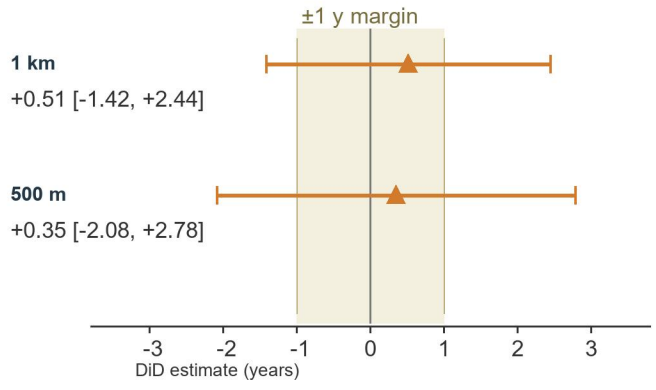

- Low EVI / low O_3
- Low EVI / high O_3
- High EVI / low O_3
- High EVI / high O_3

c Adjusted contrasts and interaction

Reference: low EVI / low O3. Circles: contrasts; triangles: DiD interaction.

d DiD precision

80% MDE: 2.76 y (1 km); 3.47 y (500 m)
TOST P (±1 y): 0.309; 0.300
Shaded band is the prespecified margin; equivalence was not established.

Points: adjusted marginal means; whiskers: 95% CI. Contrast panels use the common joint-model frame (6,471 observations).
